

MINING NOTES OF INTEREST

18 Leases are Working at Clifford

H. M. Roche returned from a trip to Clifford Saturday and reports that within the last couple of days two good strikes have been made on leasing properties some distance from the main strike of the Broken Hills Mining company. Gould and Stanley, who are working a lease some 600 feet from the main strike, have uncovered a ledge of rich ore two and one-half feet in width, about three feet beneath the surface of the ground. The ore body is rich in hornsilver, and there is a small percentage of gold. The strike is on a line with the ledge on which the main strike was made, but there was little indication of the ledge where Gould and Stanley commenced work. This ledge was hidden under a capping of Rhyolite, and after blasting this off the ledge was exposed.

The Smith brothers, who are about 100 feet west of the main property, have struck a rich ledge at a depth of forty feet, the formation and val-

ues very similar to the formation in the Broken Hills mine. Indications point to the fact that they have opened up a good thing, but it will take further work to determine the exact character and extent of the vein.

Twenty-eight leases have been signed up on the Clifford property, and eighteen of these are now being actively worked. There are some forty buildings in the camp of Helena, as the camp of Clifford is now named, and nine of these have gone up since last Wednesday. The hotel, under the management of P. V. Myers, has been moved onto the new townsite, and is doing a good business. The camp is now the home of about 200 people as against 100 who were there a week ago.

Mr. Roche reports that while returning to Tonopah in his auto he passed twelve big teams going to Clifford, all loaded with lumber, tents, supplies and so forth, belonging to people who were going to the new camp to locate.

PIONEER MINE PROVES UP RICH

RHYOLITE, Nov. 20.—Within the last two weeks the Pioneer has developed practically from a good prospect into a veritable bonanza. The mill had been quietly running along on twelve tons of ore daily, and the leasers were satisfied with the returns. A few days ago sacking began and to date over 500 sacks have been filled with high grade shipping ore. Rose and Palmer sent out 300 empty sacks to the mine Sunday, and telegraphed that evening to Los Angeles for 1000. Every sack in the country has been taken to the Pioneer.

The high-grade streak is eighteen inches wide, and is said to run over \$300. The entire width of the vein is not known, but the six feet exposed in the winze averages about \$40. The richest is sacked and the remainder goes on the dump for the mill. About twenty men are employed, and the force constantly is being increased.

Manager Bryan expects to begin shipping in a few days, and if the present production holds out, a carload a day will be sent out.

The mill is doing good work and is turning out with clock-like regularity.

WEATHER REPORT.

The following is a report of the Tonopah station of the department of agricultural weather bureau for the week ending November 20, 1908:

| | |
|---------------------------------|-------|
| Highest barometer, Nov. 17... | 30.35 |
| Lowest barometer, Nov. 20... | 30.08 |
| Highest temperature, Nov. 18 | 55 |
| Lowest temperature, Nov. 20... | 36 |
| Mean temperature | 45 |
| Average dew point | 12 |
| Average humidity | 36 |
| Number of clear days | 3 |
| Number of partly cloudy days... | 3 |
| Number cloudy days | 1 |

J. C. PIERCY,
Official in Charge.

NOTICE OF FORECLOSURE SALE

Tonopah Lumber Company, a corporation, Plaintiff, vs. Geo. A. Bartlett, and Pearl Bartlett, his wife, Defendants.

Under and by virtue of an order of sale and decree of foreclosure and sale, issued out of the District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Nye, on the 12th day of October, A. D. 1908, in the above entitled action, wherein Tonopah Lumber Company, a corporation, the above named plaintiff, obtained a judgment and decree of foreclosure and sale against Geo. A. Bartlett and Pearl Bartlett, his wife, defendants, on the 12th day of October, A. D. 1908, \$5238.32, in United States gold coin, besides interest, costs, and counsel fees, which said decree was, on the 12th day of October, A. D. 1908, recorded in Judgment Book "C," at page 41, I am commanded to sell that certain lot, piece or parcel of land, situate, lying and being in the town of Tonopah, County of Nye, State of Nevada, and bounded and described as follows:

All the defendants' right, title and interest in and to Lot (1) one, in Block four (4), West End Addition to the town of Tonopah, and the stone and frame house situated thereon; together with all and singular the tenements, hereditaments and appurtenances thereto belonging or in any wise appertaining.

Public notice is hereby given that on Monday, the 30th day of November, A. D. 1908, at 2:00 p. m. of that day, in front of the Court House door of the County of Nye, I will, in obedience to said order of sale and decree of foreclosure and sale, sell the above described property, or so much thereof as may be necessary to satisfy said judgment with interests and costs, etc., to the highest and best bidder, for gold coin of the United States.

Dated, October 15th, 1908.
J. J. OWENS, Sheriff.

By Vall Pittman, Deputy.

GRANITE NOW A BONANZA CAMP

GRANITE (Nev.), Nov. 21.—Granite mines are looking better every day. The big copper showing at the Mountain View Copper company is opened up in fine shape and Mr. Beach is now driving a crosscut to tap another ledge about seventy-five feet south, which on the surface gives splendid showings in both gold and copper. On the Big 20 Adamson and Grube, on the seventy-five foot level, have struck a shoot of sulphides about eighteen inches wide which assays \$28 in gold per ton. The shoot is widening with depth and they believe they have something good that will stay with them.

The Big 20 No. 2 lease, owned by Mrs. M. Mingle, has been consolidated with the Milton lease and the shaft timbered ready to install a hoist. An interest has been sold to Jim Bonie, who is at present in Los Angeles and upon his return the hoist will be installed and two shifts put on sinking the shaft to the 200-foot level before prospecting further.

The Wilson Gold Mines company is sinking a winze on the ore shoot that the 100 tons of \$40 ore was taken from and are now sixteen feet below the main tunnel level. A large chamber of the same character ore has been encountered, the extent of which has not yet been determined. They expect to have another 100-ton shipment to the Nordyke mill this month.

Location notices in triplicate—handiest affair for prospectors and miners—contains carbon—150 notices in book. For sale at the Bonanza office.

MINING CLAIMS SHOULD ALL BE FILED AT ONCE

Mining men who are interested in properties which lie within twenty miles on either side of the Southern Pacific railroad should get the exact locations of their claims and if the properties lie in the odd numbered sections, communicate at once with Special Land Agent D. L. Lawton, Reno, Nevada, who will receive and investigate all statements of mineralized land that is sought to be patented as agricultural by the railroad. As many of the patents will be irrevocable after January 3, 1909, no time must be lost if a contest is to be instituted.

K. OF C. WILL GIVE A BALL

The Tonopah Council of the Knights of Columbus will give its annual ball on the evening of December 10 in the Miners' Exchange hall. All of those who have attended the parties given by the Knights of Columbus will firmly attest that that order never does things by halves, and it will be so with the coming ball. Committees are already at work and in response to an invitation extended to the Goldfield council, word has been received that a great number from the southern city will attend.

THE WONDER BANK IN BAD CONDITION

Affairs at the Wonder Bank and Trust company are looking rather gloomy for depositors in this defunct money changing institution. From figures received from Receiver F. W. Westmeyer, the total assets of the concern amount to less than \$7000, and the liabilities at the time the bank ceased business amounted to \$20,586.83. At the time of the closing of the bank there was said to be about \$1600 in cash in the safe of the concern. Added to this cash, according to Mr. Westmeyer's figures, there are bills receivable amounting to \$470.75; due from other banks \$2300; real estate, assumed to be worth \$2900. From these assets are to be taken all the expenses of closing up the business.—Rhyolite Bulletin.

TURNING OUT THE BEST WORK

The bindery of the Bonanza is turning out the best work in the city, and it is giving such great satisfaction that anyone who has his work done there once, never goes anywhere else. The plant is the finest and most complete, not only in the State, but this side of San Francisco. We can turn out all kinds of work that is demanded in the offices of lawyers, brokers, promoters, mining companies, or for any other kind of business, and we guarantee satisfaction in every respect. One trial will be sufficient to establish the truth of this statement. It pays to go where only the best kind of work is done, and it pays to patronize home industry.

Properties at Gold Reef Showing Well

James Grimes, who is operating the Toggery lease at Gold Reef came in from that district Saturday. He reports that on his property they are now crosscutting on the 100-foot level and have a drift in about sixteen feet. They have cut five stringers already and all are dipping toward the ledge. The ledge is at the bottom of the drift and is full of free gold. The foot walls are true and every indication points toward the widening of the vein. There are forty-eight sacks of ore sacked and

over that amount on the dump.

The Sperry boys, who are sinking on the Preston group, now have their shaft down 22 feet. The shaft is all in ore and the width of the ledge is nine feet. They will continue sinking until a depth of 400 feet is reached, when crosscutting will be commenced.

The Fleming and Dougherty lease is now down about thirty feet and has excellent showings. The width of the ledge is not known, for no drifting has been done. The entire formation at the bottom of the shaft is changing and is getting harder.

BERLIN DISTRICT SCENE OF ACTIVITY

MINA, Nov. 21.—Work on the mill and in the mines at Berlin, east of Mina, has commenced under the new owners in great earnest. When these mines were closed down less than a year ago all the tracks and pumps were removed from the workings. These are rapidly being reinstalled by General Manager Pearson, who engineered the deal by which the Blue Bell Mining company of Goldfield purchased the Berlin mines and mill outright for cash. As soon as this reinstallation of machinery and equipment is completed, miners will be put to stoping on known ore shoots and to make extensions of the workings on the various levels. Meanwhile the thirty-stamp mill is being entirely overhauled. The mill is one of the best equipped in the state and will be running again at full capacity before the end of the month. There are now on the dumps ready for the stamps over 4000 tons of ore. This will be run immediately and by the time it is out of the way, ore from the mine will be coming to the surface fast enough to keep the mill running constantly.

BAD CHECK MAN ARRESTED.

H. Pilkington of Yerington was brought to Tonopah yesterday by a deputy sheriff of Lyon county, on the charge of passing a bogus check. The case will come up in the justice court on Monday morning, and in the meantime Pilkington has been released on his own recognizance.
